Bow Island

The New Year was ushered in with beautiful sunshine and a great thaw

Mr. Harold Beattie went to Lethbridge on business on Monday last Jan. 6th.

Mr. Bert Hand arrived home just recently from Delta, U.S.A. after an extensive visit with his brother

Mr. E. Downing is spending the festive season at home with his family

Constable Bradner was on business at Grassy Lake and was district last Wednesday

Mr. John LaMarch of Winnifred is spending the Xmas holidays with his parents Mr. and Mrs. Peter LaMarch of Olds, Alta; at the present time they are milking 17 cows in spite of it being January month; their friends wish them a prosperous new year

Mr. and Mrs. D. H. Ware and baby returned from Medicine Hat on Wednesday morning

The friends of Mr. and Mrs. R. Westland who were married at Medicine Hat on the 27th. December congratulate them and wish them the compliments of the season

Miss Holland of Regina, Sask. G.W.C.A. was a visitor to Bow Island on Monday last

Mr. Bradner returned home from Prince Albert, Sask. last Wednesday morning

Mr. W.J. Wilder of Medicine Hat was a visitor to Bow Island Sunday last

A large party of neighbors and friends some coming from Bow Island, gathered at the home of Mr. and Mrs. John Jones north of Whitla and were entertained at dancing; they were on the floor dancing when the old year departed and the new year arrived, they happy party broke up about four o'clock. All hoping another good time in the near future

To hear the wind blow it sure is a sign there will be a dance at Dave McDonnell's north of Whitla on Friday Jan. 11th. so join the crowd and make a full house

Verma Hart of Whitla was visiting for a week at Bow Island with her uncle and auntie Mr. and Mrs. A.E. Adair and returned to her home last week

**Presentation to
Rev. Father Blanchet**

On the eve of his departure for St. Albert where he will celebrate the 50th. anniversary of his ordination in the Missionary Society he was ordained by Bishop Legge. Rev. Father Blanchet of St. Patrick's mission was the recipient on Thursday evening of a presentation from a number of personal friends who gathered at the home of J.J. McDonnell. A purse of money was given the aged priest and a pleasant evening was spent in recounting "experiences of the early days". Rev. Fathers McCaffery and Cozant were also present. Others present at the presentation were L.M. Cullen of Bow Island, G. Kowal of Macleod, J.S. Boyle of Gramma and J.H. Boyle of Warner. Rev. Father Blanchet leaves this afternoon for St. Albert

Mr. McWilliams of the Stacey Lumber Co. is being transferred to Lethbridge under the same company and will be moved there at the beginning of February and Mr. Clyde Bell is taking over the Stacey Lumber yard here

"Indian Spiritualism"

"NO GREATER FAITH"

By O-GE-MAS-ES (Little Clark).

(Copyrighted)

Indians are varied in character, much like white men, but I have known intimately a number of the older men who were spiritualists and they had "Faith in themselves." One instance comes back to me while writing. Eesa-wa-pum-o, an elderly Saulteaux, was my steady friend for many years and it was a real grief to hear of his death in November, 1919. A friend, who is specially interested in Indians, was especially fond of Indians, especially finding their deers in winter. He did not disclose his methods, but I always insisted that he smell them out, much to the old man's amusement.

On one occasion in March of a long, steady winter, word came that they were casting hungry glances at the food, which evidently they had not yet tasted. Finally grace was over and I heard "How" from the entrance to the tepee. They came out like a swarm of bees delighted to see the trader with his load of good things to eat.

Camping in the old man's tent as usual, and after a number of words on the menu, I had him describe the finding of the bears, which he did most graphically, and further said that when starting out early that morning he had long and carefully searched for game, and had success in his hunt, and can see for yourself the reply: "Bear meat in plenty and furs to purchase the flour, tea, bacon and sugar our good trader has brought us."

"What?" I asked. "Very fat?" was his reply.

"Yes," he said, "and the two large bears, the latter sucking their mother."

"As they had been in the woods since last October or early November, when an ear did not tell the bear who had eaten his cubs, as they were up no food in their winter quarters?"

"Why?" was Eesa-wa-pum-o's reply.

"You know all about that."

"How is that?"

"Why, you Big Book tells you."

"Oh, you are stupid. Why, Kitchen-Musila-na-gus of course" (meaning Bible).

"But what does the Bible say about bears?"

"Why, God gives her the milk."

And verily the old pagan Indian, reply made me speechless, for I could think of no other solution.

Shipyard Opened

Will Build Freighters at Vancouver For Canadian Government.

Vancouver—The shipyard of J. Coughlan and Sons, Limited, closed for several weeks past, resumed operations on January 3, with a largely augmented force of men. When the Canadian Government secured the firm had 300 men employed, but when the yards resumed, 1,000 were put at work on two steel freight steamers of 1,000 tons each. These vessels will cost approximately \$1,000,000 each, and will take four months to build. The steamers will be constructed for the Canadian Government.

More than \$12,000,000 worth of marine equipment is required, and will be authorized by the Canadian Government for Vancouver and Victoria, including the construction of steamers, piers, Victoria drydock and financial assistance in ship construction.

Irish Countess Goes to Prison

Sentenced to Two Years Hard Labor For Conspiracy.

Dublin—Countess Georgina Markievicz who was tried by a court-martial on a charge of conspiring to organize a seditionist society, was sentenced to two years at hard labor in prison for treason. She was tried when she was the last, however, on January 18, 1919, and September 1, 1920, plotted to organize a "fanna" (rebel) or Sinn Fein Boy Scouts Society. This organization has been charged with the conspiracy to murder military police and with unlawful drilling.

Sabots Connot Teach Militarism.

Amsterdam—A despatch to the Handelsblatt from Dusseldorf says the Inter-Alled Rhine Commission, alarmed because of the spread of militarism in German schools, has issued an order prohibiting the use of schools for military purposes on penalty of arrest and confiscation of the schools.

Canada Gets Large British Contract.

Vancouver—Major-General J. W. Stewart, of this city, and his associates, have been awarded by the British Government, on behalf of the Gold Coast, the first main of which amounts to \$17,000,000, according to advice received from London. Major-General Stewart's firm also has been appointed engineer to the British Government on the Gold Coast.

Repudiates Treaties.

Madrid.—The Spanish Government has given notification of the denunciation on March 20 next of the commercial conventions between Spain and Denmark, Holland, Sweden and Switzerland.

Co-Operative Societies On the Increase

Several New Associations Have Been Formed in Alberta.

Calgary—About 130 co-operative trading associations are on the books of the Provincial Secretary. Several new associations were formed during the closing weeks of the year. A large proportion of the co-operative organizations have been promoted and are now being conducted in conjunction with United Farmers of Alberta ideals in different parts of the province.

Fighting Embargo On Canadian Cattle

Sir George Perley Says Disease Does Not Exist.

London—The Daily Express has interviewed Sir George Perley, Canadian high commissioner, on the embargo against Canadian cattle. Sir Perley says he is carrying on a personal campaign to get the British Government on the matter, and adds that Canadians do not mean to rest until what they regard as a wrong to Canada is righted. He lays stress upon the understanding reached in 1917, that the embargo would be raised, and upon the fact that it is retained as a protection against the importation of a disease which does not exist among Canadian cattle.

Agriculturists Meet

Noted Western Agronomists at Edmonton Convention.

Edmonton, Alta.—The second annual convention of the Western Canadian Society of Agronomy was held at the University of Alberta here with 150 agronomists from all parts of the west in attendance.

The visitors were taken on a tour of the university buildings and grounds, visiting all departments of the institution under the guidance of members of the faculty of agriculture at the university.

Among the visitors were Professors T. H. Harrison and G. H. Ellis, of the University of Manitoba; M. E. L. and Dr. J. S. McLean, of the University of Saskatchewan, and the superintendents of the various experimental farms throughout the west. Instructors in field husbandry at the provincial agricultural college and in the local faculty of agriculture at the university are others in attendance. Officials from the Dominion Department of Agriculture at Ottawa were also present at the convention.

For World Disarmament

Leading European Statesmen Practically in Agreement on Naval Holiday Question.

New York.—The New York World, in the second of a series of articles advocating disarmament, publishes cables messages from a number of the men of Europe. Following are extracts from a number of them:

Lord Beaverbrook says: "Great Britain, Japan and America ought to agree on a naval holiday, during which no ships should be built and all should stand under a ban on naval power, following suit."

The Daily Express says: "It is agreed that naval war will give birth to no good, alike will gain no profit. If the communists of mankind cannot agree for its mutual protection, common folly will work its ruin."

Lord Balfour: "The path of international disarmament is the only one that can lead the world to safety. Competition between nations in armament is a race for bankruptcy—a race in which the last man stands."

Lord Bonar Law: "It is to me rather that naval war will be done away with in the United States by expeditious operation proceeding from England on the question of disarmament, but I hope for an early opportunity of expressing my own feelings on the subject in Parliament."

Fleet Coming to Pacific Coast

Plans to Reach Esquimalt About March 1st.

Ottawa—The people of the Pacific coast will probably have their first look at Canada's new fleet early in March. According to present plans, the British and United States fleets of the coast of Ireland during the war, has arrived here on the Pacific mail liner, Ecuador. Four United States destroyers escorted the Ecuador.

Bolhevists Reduce Armed Forces.

London—Partial disarmament of the Russian Bolhevist army has begun, owing to the completion of the more important military operations, says a Moscow despatch. This, the message adds, will make it possible for Soviet Russia to concentrate upon the principal economic problems of the country.

Major Bell Transferred.

Vancouver, B.C.—Major Bell, assistant director of the Soldiers' Reconstruction in Halifax, has been transferred to British Columbia, with instructions to go to Victoria and see General Dean. The change will go into effect January 15. Major Bell has left the east for Vancouver.

De Valera Resting.

Port Arthur, Ont.—Major Mathews declined to accept \$1,500 voted by him to the City Council in part remuneration for services rendered during the year. He said money was no inducement. He accepted the position, he served from a sense of duty and was willing to do it free.

Princess Mary Drives Own Motor.

London—Princess Mary, the only daughter of King George, has determined, after many protests by her mother, to drive a car of her own.

Leader of Progressive Party

HON. T. A. CRERAR.

Dominion Leader of the National Progressive Party, whose first declaration of policy was given at a meeting in Winnipeg, December 10th, which was also addressed by Premier Drury of Ontario, both speakers being enthusiastically received.

Canadian Cattle for Australia

"Colony" Champion Bull, Purchased By Southern Breeder.

Vancouver B.C.—The young bull "Colony," frontier champion owned by the Colony Farm, and winner of the junior champion title at the Vancouver exhibition this year, has been purchased by W. Barton, of New Zealand, a prominent breeder of Holsteins, and has been shipped to that country. The price paid is said to exceed \$1,000. Mr. Barton, of Canada, the animal passing through this country recently.

Within the last year cattle have been shipped from British Columbia to Honolulu, New Zealand and Australia.

Close Phonograph Works.

West Orange, N. J.—The phonograph works of Thomas A. Edison, Inc. are closed, and will remain closed indefinitely. The record department is not affected. "General business in the phonograph industry," were given by company officials as the reason for closing, which affects 800 employees.

Strike Oil in Vancouver

Storage Tanks Being Built to Hold Crude Oil.

Vancouver, B.C.—Announcement by Sydney Mr. McNamee, expert, that the storage of oil by the Sparrow oil well, started a boom in the oil industry throughout the city, was announced by Premier Stewart following a meeting of the provincial executive council when the opening date was finally decided upon. The legislature, after further, entered, on the 20th, into the bill, and the bill, last session, which convened February 17 and prorogued April 10. Although no outstanding new legislation is slated to be brought down, in the coming session, it is alleged, likely that another bill will be introduced before the house will be in session exceeding in length that of last spring.

Fortune for Maid

Boston Women Leaves Half Million To Forgo Services.

Boston, Mass.—The domestic service of Agnes McNamee in the family of Mrs. Mary Gilbert Knight is to be rewarded with a legacy of half a million dollars. The executors of the will of Mrs. Knight filed a petition in the Probate Court last Friday to make a distribution of the property, reporting that all specific public and personal bequests aggregating \$198,200 had been paid.

The estate was worth \$697,928 they said, and the balance, \$1,000,000, had been left for her servant, who was named residuary legatee.

Clergymen Travels By Plane.

Berkeley, Ont.—Rev. Mr. Taylor, Anglican clergymen of this town, flew to Canfield Borden on Christmas morning in the company of his wife and son, to attend the Christmas morning service in the Anglican Church here.

De Valera Resting.

New York—Eamon de Valera, leader of the Sinn Fein party, has been in seclusion several weeks ago for a rest" is still indisposed in his hiding place in the city, Harry Boland, his secretary said.

A man can never gain ground during his courtship if he is unable to hold his own.

W. N. U. 1349

Last Phases of The Struggle In Defence of Fiume

Commander of Canadian Fleet at Ottawa

Capt. Adams Submits His First Formal Report to Headquarters.

Capt. Henry Adams, C.B.E., R.N., leader of the Canadian fleet, who has arrived in the capital from Halifax, was in consultation with Hon. C. C. Ballantyne, minister of marine and naval affairs; Deputy Minister George D. Desbarats, and the naval attaché, Captain Walter Rose, R.N., acting director of the naval services, and other officials of the department.

The purpose of Capt. Adams' visit to the capital is to make his first formal report to headquarters before the fleet starts on a cruise to the West Indies and thence through the Panama Canal to British Columbia waters.

As a result of his visit Capt. Adams will establish personal acquaintances with Canadian naval officials at the capital and become acquainted with Canadian conditions thereby ensuring the smooth working of Canadian naval affairs.

Refers to Party Politics Only

Hannan Makes It Clear Municipal Politics Not Indirect in Recent Edict.

Toronto—President D. B. Hannan, of the Canadian National Railways, in an interview here, in which he was asked if his order forbidding C.N.R. employees from being candidates for political offices, signed by Secretary R. C. O'Conor, of the C.N.R., and Mayor of Leaside, Ont., made it clear that the order did not include municipal politics.

"The order simply deals with participation in politics," said President Hannan, "and has nothing to do with municipal politics. On the contrary we rather encourage our employees to take a full and keen interest in municipal politics."

Mr. Hannan added that Mr. O'Conor had his fall in approval in taking special interest in Leaside. The Canadian National Railway shops are in Leaside.

To Check Crime

May Ask For Suspension of Parole of Prisoners For A Period.

Toronto—To aid the police in checking crime, Chief of Police Saml. Dickson seriously thought of asking the parole board to suspend the parole of prisoners for a period of time.

Police records show that eighty people convicted of crime have been released on parole from Kingston and Burwash prisons.

The records show that 1,000 offenders have been released from Kingston and Burwash prisons.

During the year, 1,000 offenders have been released from the prison.

Fresh from Old Land, Married at Taber

TABER.—On Tuesday, December 28th, the wedding took place at St. Theodore's Church, of Miss Dorothy May Hopkins, of Burdett, to Mr. David James Burns, of Grassy Lake; the Rev. F. D. Leeser officiating. The bride, who arrived a short time ago from the motherland, was given away by Mr. Alex. Primrose of Taber. Mrs. Primrose was present at the ceremony also. A reception was held at the home of Mr. and Mrs. Primrose at the close of the ceremony. A happy circumstance was the fact, that the bride had been born and reared in the same part of the old land as the officiating minister, who was well acquainted with her people, and this romantic incident was only discovered during a conversation after the ceremony.

Flies to Church

BARIE.—Rev. Dr. Taylor, Anglican clergyman of this town, flew to Camp Borden on Christmas morning in order to celebrate holy communion in the camp. The service was held in the doctor's office in the camp hospital, and there were 13 communists. Capt. Tuthope, in a Curtiss machine, carried the rector to Camp Borden and back in time for the Christmas morning service in the Anglican church here.

AMERICAN DESTROYERS ESCORT ADMIRAL OF THE BRITISH NAVY TO PORT

SAN FRANCISCO.—Excorted by four United States destroyers, Admiral Sir Lewis Bayley, of the British Navy, joint commander with Admiral Wm. Sims, of the British and United States fleets off the coast of Ireland during the war, arrived here on the Pacific mail liner Ecuador from Honolulu.

A total of 3,808 persons were killed in automobile accidents, or died as a result of injuries received therefrom, in the United States last year, it is announced by the Census Bureau.

The cost of a Bushel of Wheat

Among the farmers of Alberta there is at present much discussion concerning the bushel. A bulletin has recently been issued by the North Dakota Agricultural College which contains material of great interest. It shows the results of a co-operative experiment covering two groups of farms for the State of North Dakota: one group of 113 farms and another group of 320. The object of the work was to obtain reasonably accurate information as to the cost of producing wheat and some conclusions were drawn, which, while not final, are most instructive. One item seems to have been underestimated was the charge for the use of land, this was put at \$3.10 per acre disregarding entirely the loss of fertility resulting from production of the crop. Other items of cost considered were seed, man-labour, horse labour, machinery, taxes, rent, interest, insurance, telephone and management.

The record covers the year 1918, which it is conceded was an unfavorable year for crop production. The cost per bushel would therefore be high but the relative figures would be about average.

The first conclusion is that the yield per acre is the largest factor influencing the cost of production. On 113 farms the cost per bushel varied from \$1.84 to \$6.82 per bushel, depending upon the yield per acre, which varied from one to 17.5 bushels per acre. Fifty per cent of the wheat produced on this group of farms was raised at an average cost of about \$2.00 per bushel, while the other fifty per cent cost over \$3.00 per bushel.

Of the 320 farms group, the average cost was \$10.33 per acre and \$2.75 per bushel. The cost ranged from \$8.33 to \$3.45 per acre and \$1.00 to \$3.08 per bushel. The average yield per acre was 7.2 bushels in the range in yield was from one to 17.5 bushels per acre, the wide range in yield and cost points directly to the value of increasing average yield as a means of reducing the cost of production and thus increasing the profits from wheat-growing.

Seven Persons

Mrs. Eva Shaw, member of this district committed forgery some few weeks ago, she was found guilty and was sentenced in a term of two years imprisonment in jail, she was taken to Prince Albert last week but will be later moved to Kingston, Ontario

Winner of Many War Decorations Now Destitute

Pitiful Tale told Mayor of St. John by Veteran Seeking Work

ST. JOHN, N.B., Jan. 4.—Winner of the Victoria Cross, the Distinguished Conduct Medal with bar, the Military Medal, the Royal Humane Society Medal for life saving and the French Croix de Guerre, was out of work without prospects of a job to cover his head tonight—this was the combination of circumstances related to Mervin Seefeld, at the city hall this morning, by ex-Regimental Sergeant Major Alber E. Wood, 78 years of age, a veteran of four wars, and entitled to less than ten dollars per acre disregarding entirely the loss of fertility resulting from production of the crop. Other items of cost considered were seed, man-labour, horse labour, machinery, taxes, rent, interest, insurance, telephone and management.

The record covers the year 1918, which it is conceded was an unfavorable year for crop production. The cost per bushel would therefore be high but the relative figures would be about average.

The first conclusion is that the yield per acre is the largest factor influencing the cost of production. On 113 farms the cost per bushel varied from \$1.84 to \$6.82 per bushel, depending upon the yield per acre, which varied from one to 17.5 bushels per acre. Fifty per cent of the wheat produced on this group of farms was raised at an average cost of about \$2.00 per bushel, while the other fifty per cent cost over \$3.00 per bushel.

Of the 320 farms group, the average cost was \$10.33 per acre and \$2.75 per bushel. The cost ranged from \$8.33 to \$3.45 per acre and \$1.00 to \$3.08 per bushel. The average yield per acre was 7.2 bushels in the range in yield was from one to 17.5 bushels per acre, the wide range in yield and cost points directly to the value of increasing average yield as a means of reducing the cost of production and thus increasing the profits from wheat-growing.

On recommendation of one of the city commissioners, Wood has submitted a letter to the common Council asking for work.

Maritime Nail Works Close Indefinitely

ST. JOHN, N.B., Jan. 4.—The Maritime Nail Works have decided to close indefinitely. Two hundred men are thrown out of employment and the business interests of the city will be deprived of a payroll approximating \$25,000 a month, said Elmer M. P. Moore, managing director, claiming the wages insisted upon by the union make it prohibitive to carry on the business in competition with other factories which have the open shop and are not dictated to by their employees.

PURE MILK AND CREAM

We Beg to announce to Our Patrons and the General Public that we have made provision for a plentiful supply of Milk for the Winter.

We are not quitters we are here rain or shine.

Your Convenience is Our First Consideration.

Our Slogan 'Dependability and the Best of Service'.

Will Our Patrons please return the bottles each morning when we call

A. 1. Cream always on hand.

BOW ISLAND DAIRY

J. & H. POLLITT, Proprietors

PLUTOCRATS PAY \$2,000 PER PLATE FOR BEEF STEW

DRUGGISTS NOT TO SELL LIQUOR

According to the Calgary Alberta the dispensing of liquor will be taken out of the hands of the druggists at the session of the Alberta Legislature, if plans which are being considered by the Government go through the House.

This will not comprise all the changes in the liquor legislation, but it will be the most important.

The liquor will still be dispensed on prescriptions by the medical men, but these prescriptions must be presented to the Government vendor stores. The liquor business will be entirely divorced from the drug stores.

That will make necessary an increase in the number of vendor stores, but the Government has not decided yet how many stores there will be or where they will be located.

PRESIDENT WILSON 61 YEARS OLD ON DECEMBER 28

WASHINGTON.—President Wilson celebrated his 64th birthday on December 28th, receiving numerous messages of congratulation.

Among the messages of congratulation received was one from King George.

The Seeing Eye

Principal Reynolds of the Ontario Agricultural College thus delivers himself in the Agricultural Gazette of Canada:

The teacher who hopes to take a right place in the life of the country school district must cultivate the seeing eye and the understanding heart for persons and things rural. The usual, popular, melodrama, comic supplement, moving picture conception of the farmer must be forgotten. It is essentially and perniciously false. The farmer is something of a humorist, and takes delight in deceiving the simple minded by a somewhat unfeeling exterior. The city-bred person makes the fatal mistake of judging by outside appearances. To the city-trained eye there are two classes of persons, one wearing overalls and the other wearing white collars. The former class work with their hands. The latter class work with their brains. That is the principal judgement, which ignores the fact that there is a very great deal of clear hard thinking done to-day by the men wearing overalls. At any rate, the farmer belongs to both classes. The more he understands of those discoveries, which it is the business of the agricultural college to make, the more he absorbs the teaching, which it is the business of the college to spread abroad. The better farmer will be he.

The Weather

December 1920

Friday 31st. Heavy fall of Snow in the early morning, about 1 foot deep.

Saturday 1st. Sunny and warmer.

Sunday 2nd. Warm and bright sun-shine all day.

Monday 3rd. Bright sun-shine and warmer.

Tuesday 4th. Coldest, some snow.

Wednesday 5th. Warmer with slight snow.

Thursday 6th. Bright sun-shine and cold wind.

"Bone-Dry Date is Officially Gazetted

OTTAWA, Jan. 4.—(Canadian Press)—An order is officially gazetted today fixing February 1st, as the date on and after which importation of alcoholic liquors into Nova Scotia, Alberta, Saskatchewan and Manitoba will be illegal.

Pushing the Wheat Area Westward to Base of the Rockies

Under the leading "Alberta Leads," the Edmonton Bulletin says editorially that the record of this province at the Chicago winter fair places the foothill province definitely on the map as a wheat producing country. However, Alberta's rise as a ranching country has tended against the general acceptance of her wheat growing capabilities. When settlement first broke into the prairie west the Red River valley was thought to be the wheat area of the world.

Then the remainder of the province of Manitoba was included; and Manitoba No. 1 hard wheat became a standard of highest quality on the world's markets. Next came Saskatchewan, which had two wheat producing processes in volume of wheat production. Even Alberta took for granted that for some unexplained reason Alberta conditions were less favorable to wheat production than those wheat areas prevailing in either Saskatchewan or Manitoba.

The results at the Chicago fair are a revelation, the full importance of which is not easy to realize. The wheat area pushed westward to the base of the Rocky Mountains.

And not only the area of wheat production, the best wheat is produced in that area which lies furthest west. Of twenty-five prizes given for wheat to Canada, twenty-four went to Canada, and seven of these to Alberta.

Against all the other provinces of Canada and all the states of the Union, Alberta took nearly one-third of all the wheat prizes offered. That settles any question of wheat quality in high class wheat in Alberta.

It was not remarkable that there should be question as to the growth of high quality wheat in the province. Backed by the Rockies, Alberta is naturally at a considerable climatic advantage which Saskatchewan and Manitoba. An altitude in fact at which in such a northern latitude, wheat could scarcely be expected to be produced in highest perfection, if at all.

On the other hand, the wheat growing conditions in Alberta are as good as in any state in the Union.

Five years ago the Geneva valley in New York State set the standard of wheat production for the continent. After many years the wheat fields of Southern Minnesota became famous. Then the parallel was immediately made by many scientific experts to the northern limit of wheat, with the possible exception that of the Red River valley north of the international boundary.

Now we know that Canada's wheat fields extend from the Red River to the Rocky Mountains, eight hundred miles in direct distance, and that in that area the highest quality

is to be found in the wheat of Alberta.

The League Lives

Closed Its Sessions With Forty-Seven Nations, North and South. To-day

For the League to have lived through the hostile criticism and cynical prophecies that dogged it at Geneva, as well as the inherent difficulties of its work, is itself a triumph. The break-up was predictably predicted. While Argentina's

Argentine withdrawal there was a chorus of cries that this meant the beginning of the end. The forty-one nations were about to fly apart like so many mutual repellent atoms. But the fury of the storm passed, and so the League was admitted, so that the League closed its sessions, having weathered all storms, with forty-seven nations now adhering to it. Not even the most skeptical and pessimistic observer has any longer the badminton to stomp contemptuously at the League as "dead."—From the New York Times.

Faith Heart.

"I thought you were going to kiss me when you packed up your lips just now."

"Jock—No—er—it was only a piece of grit in my mouth."

"Doris—Then, for goodness sake, swallow it—you need some—Rude, buxom Scotsman."

The "whistling" swan is found in Iceland, Lapland and Northern Russia. It produces whistling or trumpeting through its coiled wind pipe.

Kerguelen Island, in the Southern Indian ocean, is over three thousand miles from the nearest mainland, and no swan claim to being the most isolated island.

The Earl of Minto

See the former Governor-General of Canada, whose forthcoming marriage to Miss Cook, of Montreal, is announced.

Tributes to The Unknown Warrior

One Mother Brought War Medals Belonging to Son Reported Missing.

Scenes of touching instances have been witnessed at the tomb of Britain's "Unknown Warrior" in Westminster Abbey as the five sons, women and children have passed the black marble slab covering the grave since the burial there of the unidentified soldier.

The same fact that no one knows the name of the son who lies beneath the slab leads many to offer tributes in the hope, perhaps that it is that of a missing son. The mother of one of the thousands of unknowns, Mrs. John Abbott, laid

three war medals, the Mons Star, the Victory medal and the British War medal on the grave as she passed in the line.

They had been awarded to the only son, who was wounded three times and afterwards reported missing.

A soldier's modest offering of flowers bore the inscription: "In loving memory of my two sons and my wife who feeds us."

The epitaph placed on the slab reads: "For King and Country—Greater Love Hath No Man Than This."

Thursday England's Best Work Day.

What is the best work day in England? Inigo Jones, of British Industries Research Board, can

answer that in England most work is done on Thursday, with Wednesday a close second and Saturday the worst day.

The strength of growing plants and trees is enormous. A small grass plant will split a rock, and young oak roots have lifted a block of granite.

Johnson will do much for a man, but it will not teach him to look for the towel before filling his eyes with soap.

United States And Japan

Trying to Stir Up Trouble Founded On mere Speculations.

Owing to the jingo element in both countries, the feelings between Americans and Japanese are not as cordial as between the British and the French farmers against its admission to the United States confirm the judges' decision at the Chicago fair, that as a wheat producer the Canadian west has arrived, with Alberta in the lead.

Alberta did well in what she did better in oats. The champion, with a sample weighing two pounds to the bushel more than any other sample in the show, and eight out of the ten entries for the region which includes the western part of the Canadian prairie west and the states of Montana, Idaho, Washington and Oregon, is doing well enough. While there never was any doubt of the ability of Alberta to grow grain oats, the standard weight of oats in the United States is thirty-two pounds to the bushel. In Canada thirty-four pounds. But the Alberta champion sample weighed only twenty-eight pounds to the bushel, and the grain was equal to that of the nearly fifty per cent. over the standard weight of the United States. The importance of establishing the superiority of Alberta's oats lies in the fact that the grain is not only a good feed crop, as corn does in the United States, oats are more cheaply, easily and surely raised here than corn is there; and gives as large a tonnage of feed per acre. With a proportion of feed to grain as good as that of oats, the Alberta stock raiser would be at a serious disadvantage as against the stock raiser who feeds corn.

But with heavier yields of oats per acre and a better quality of grain, the advantages of corn in Iowa are equalled by those of oats and even better in Alberta.

Alberta, too, has two prairie to bushel ratios, and the same with all the states and all the provinces this is a good showing. But it falls down badly when compared with Alberta's own showing in oats and wheat. However, there is not now any need to compare the results of production of wheat in Alberta either as to quality or quantity.

The case in regard to barley is not as important as that in regard to wheat, as some of the Scotchmen of license, in specifying the Alberta provincial exhibit of barley (shown for exhibition purposes only), declared that they would not have believed such barley was grown in any country.

What the Scotchmen say is that the barley of the League is probably better than the Greeks, but his foreign policy spells the collapse of the project of a Greek Empire. Rhallais

would probably rather not be among those who can be blamed when the crash comes.—Edmonton Bulletin.

An Undesirable Post.

Parsons Rhallais, of Greece, has decided to keep the office, so not much because he wants it as because he naturally also wants to be a member of the League.

Consequently he is personally popular with the Greeks, but his foreign policy would probably rather not be among those who can be blamed when the crash comes.—Edmonton Bulletin.

The strength of growing plants and trees is enormous. A small grass plant will split a rock, and young oak roots have lifted a block of granite.

Johnson will do much for a man, but it will not teach him to look for the towel before filling his eyes with soap.

Population of Canada Shows Greater Increase Than Any Other Nation

Canada has led the world in the past decade in the proportional development of her population, and authentic figures give her a greater percentage of increase in her people than any other country, young or old. The most recent published directory figure of Canada of a population of 8,835,102. Returns of the 1911 census reported a population of 7,066,043 in Canada. This gives, for the sixteen year period, an increase in the people of Canada of 1,769,059, or 24.72 per cent. The increase in the people of Canada was but 1,677,257, which gives for the period of nearly five years an increase in population of almost 10 per cent.

Counties increase their population in two ways—by natural reproduction through births and by immigration. The former is the natural result of the increase in the birth rate, the latter of an increase in the number of immigrants.

Counties increase their population in two ways—by natural reproduction through births and by immigration. The former is the natural result of the increase in the birth rate, the latter of an increase in the number of immigrants.

The older countries of Europe, such as the United Kingdom and France, increase the numbers of their citizens almost wholly through the immigration of people from outside their own countries. This is almost negligible. Never countries like the American confederacy and the Dominions of the British Empire find that their multiplication comes to any great extent through immigration, which a healthy birth rate, of course, varies largely with different countries and does the percentage of infant mortality, both of which are important factors in determining population increase.

The United States Census Bureau has announced that as a result of the census figures recently concluded, an increase of 14.9 per cent. is recorded for the Republic for the decade just past. The increase in the United States is 21 per cent. for the decade 1900-1910. The bureau accounts for the fall off largely by the decline in

immigration. The United States, as a country largely built up, while still attracting and having a nearly increasing population, is in a status somewhere between the older European countries and the newer British Dominions, and its last census figures form an equitable basis for comparison. The total population of Canada in 1911 was 8,835,102. Returns of the 1911 census revealed a population of 7,066,043 in Canada. This gives, for the sixteen year period, an increase in the people of Canada of 1,769,059, or 24.72 per cent. The increase in the people of Canada was but 1,677,257, which gives for the period of nearly five years an increase in population of almost 10 per cent.

A PARADISE FOR SKI-MEN

(1) Where falls are good fun.

Canada of Calgary, the Paisley of the West, is a team from Edmonton, the capital of Alberta, Canada, which has a population of 100,000, and is ideally suited for winter sports and this season the dates have been fixed from January 29th to February 5th inclusive. The Secretary writes that the Canadian team is to be considered the strongest in the world.

Our Ski Hill has now been completed in accordance with the suggestions made by the world's champion, Anders Haugen, of Brønfen, Minn., and we are confident that a world record will be broken in the hills of Alberta.

Preparations are already being made for the annual carnival to be held at Banff amidst the glories of the Canadian Rockies, and the date has been fixed for January 29th to February 5th.

Our Ski Hill is to be the largest in the world, and we are confident that a world record will be broken in the hills of Alberta.

Our Ski Hill is to be the largest in the world, and we are confident that a world record will be broken in the hills of Alberta.

(2) Skating in the Canadian Rockies.

Skating in the Canadian Rockies is one of the different sports in which we are interested, and the opportunities for skating on these occasions will be most interesting.

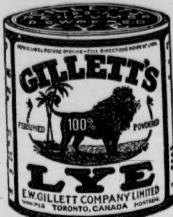

"Special attention will again be given to art and fancy skating and competition in these items on our programme to be very interesting.

The Skating Club of Vancouver, with a membership of almost three hundred, has written saying that the club will be well represented and if we could be assured of some entries from Eastern Canada and the United States, we would be pleased to have them.

Our Skating Club is to be the largest in the world, and we are confident that a world record will be broken in the hills of Alberta.

Our Skating Club is to be the largest in the world, and we are confident that a world record will be broken in the hills of Alberta.

W. N. U. 1549

Increase in Horse Industry

Prediction That Horses Will Seriously Affect Automobile Business, Looking for a steady increase in the horse industry of Canada to such an extent that it would seriously affect the automobile and truck business of the country, and asking a ban on the Dominion Department of Agriculture for expressions of opinion as to the use of horses from an economic standpoint as against motors, H. S. Arkell, Dominion Livestock Committee, velocities, and the like. The horse industry is one which is likely to come back to real prosperity, in his address at Calgary before the annual meeting of the Western Canada Livestock Union.

Minard's Liniment Co., Limited.

Gentlemen.—Theodore Dore, a customer of your store, has been ill for over five years suffering by the judicious use of MINARD'S LINIMENT.

The above fact can be verified by writing to him, to the Parish Priest or any of the following:

St. Isidore, Que., 12 May, '98.

Ex-Princess' Livelihood.

Articles made from rags were on view at Keweenaw, Michigan, on December 16 and 17. They are the means of livelihood for Mme. Walkoff, formerly Princess Troutzky, who escaped from the Crimea with the Dowager Empress of Russia.

Worms. In children worm larvae attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately bring about death. This is because these worms are of the hook variety that cling to and feed upon the intestinal walls.

Worm Powders will not only exterminate these worms, of whatever variety, but will also be capable of repairing the damage they have done.

Almost the Contrary.

Jinks had been out the night before and was late at his work.

Employer (smirking).—"Well?"

Jinks—"Not very, sir."—Stray Stories.

Some oyster dealers are working the old shell game.

"I Wonder Would It Help Me?"

THIS question has been answered by many thousands of women who have found health and happiness in the use of Dr. Chase's Nerve Food.

Stresslessness, irritability, nervousness, gloomy forebodings of the future, depression and discouragement—these are some of the symptoms which tell of exhausted nerves.

In order to avoid these symptoms of nervous prostration it is well to get the building up process established as once by use of Dr. Chase's Nerve Food.

"Oral Hygiene" Lay Education Series
"YOUR TEETH"

First Stage of the Decay of the Teeth.

By Rev. Proctor McGee, M.D., D.D.S.,
Editor Oral Hygiene.

If your hands and fork, spoon, plate, cup and saucer were left from one meal to another without thorough washing, you would change your boarding house.

It is not so particular about outside water unless you thoroughly cleanse your own mouth after each meal.

When food is allowed to pack between and around the teeth, it gets a good start. The packed food decomposes and ferments, this makes the bacteria happy so they all move.

As the bacteria get settled upon the enamel surface of the teeth, they cover themselves with a casting called a gelatinous plaque. Under this protective covering the bacteria grow unless they are removed by thorough cleaning.

Decay of the teeth carries, "is a disease just the same as tuberculosis or mussels is a disease. In this disease the hardest tissue in the body is affected."

The bacteria of decay are really tiny plants. They live and die as other plants do, when they die they decompose and ferment, forming an acid. This acid, in its fresh state, will dissolve the enamel of the tooth a very little at a time at first, but the further in the bacteria they get the more rapidly they work.

The enamel of the teeth is very sensitive. It is composed of tiny particles which are shaped into microscopic rods that are bound together by a natural cement. The rods all point towards the centre like the bricks of an arch. Enamel is a strong armor, a strong point of a tooth, but the decay gets through the armor as it reaches the ends of the tiny fibers from the nerve that radiate through the body of the tooth.

It is here that you get your first sign of decay. You will notice trouble ahead, trouble that only one person can stop. Don't delay, your teeth are too valuable.

Sewing Machines.

About 60 million feet of lumber are used annually in the manufacture of sewing machines. Oaks and red gum supply nearly two-thirds of the lumber, and yellow poplar and black walnut, each a little more than one-eighth, the remainder being made up of maple, basswood, birch, sycamore, mahogany, yellow pine and redwood.

Tops of sewing machines are usually made of hardwood veneers such as oak or walnut, or of other woods stained to imitate mahogany.

Mother Graves' Worm External.

to treat worms in children without injury to the child, before its action, while fully effective in her divorce suit a year ago.

Announcement is made that Sir Alfred Mond, financier, will leave London early this month for Palestine, where he will spend some time studying conditions in connection with the plan for the country's development.

Influenza attacks carry with them a definite immunity from subsequent attacks, lasting several years," according to conclusions reached by the United States public health service after extensive study.

Mother Graves' Worm External is a safe, effective and safe remedy for worms in children without injury to the child, before its action, while fully effective in her divorce suit a year ago.

Spending the Savings.

FREQUENT HEADACHES

A Sure Sign That the Blood is Watery and Impure.

People with this blood are much more subject to headaches than full-blooded persons and the form of headache requires constitutional treatment internally and acts through the blood on the brain. The CATARRH MEDICINE destroys the fountains of the disease, gives the patient a new lease of life and removes the cause of death in 90% of cases.

Whenever you have constant or recurring headaches and pallor of the skin, you should take CATARRH MEDICINE and your efforts should be directed toward building up your blood. A sure sign that the blood is watery and impure is that the pink pills will do this effectively, and the rich red blood made by these pills.

As Mother Graves' Way.

"What's worrying you, Jim?" asked a miner as he met his comrade.

"These words!" replied the other, a newly married man. "They are my new wife!"

"What's the matter?"

"I'm not saying," said the young husband, "that this morning the miasma caused me out of the house in a flying panic when I went home tonight when I was crying her eyes out because I hadn't kissed her when I went out!"

It is considered that from a tenth to a quarter of the cost of foodstuffs in the United States goes to pay for crates and other containers that are thrown away instead of being used a second time.

Working for Solution

CARRIERS STUDIED EXCHANGE ON INTERNATIONAL FREIGHT.

Definite progress towards a solution of the vexed question of exchange on international freight charges between the United States and Canada seems likely, as a result of a meeting of representatives of the principal Canadian carriers at Montreal last week.

The question, which is a most complicated one, was again considered from all its angles, and a tentative plan was prepared involving an average exchange of 10% on all foreign imports. This would lead to a reduction which will be satisfactory to all parties interested. It is appreciated, however, that in the working out of this problem it is of the utmost importance that the integrity of the through routes by the different gateway ports be maintained to avoid the danger of a cancellation of all international tariffs.

Owing to the diversity of conditions affecting the various routes of exchange and the far-reaching effect of any action which may be taken, a full examination of the international charges of consultation with United States carriers is necessary. This has already been undertaken by a committee of the International Board of Trade for the purpose, and the matter will be passed to a definite conclusion at the earliest possible date.

A Frightful Death, Suffocated by Asthma

The Dread of Such an Unhappy End Oppresses Every Sufferer.

Every sufferer from Asthma knows the terror, the fear that overcomes them, when struggling for breath, may help, but never cure. Best results come from CATARRH MEDICINE, which relieves asthma and cures it.

When the asthma comes on, the Catarrhine kills the asthma germs that it reaches the ends of the tiny fibers from the nerve that radiate through the body of the tooth.

It is here that you get your first sign of decay. You will notice trouble ahead, trouble that only one person can stop. Don't delay, your teeth are too valuable.

Alberta's Pulp Forests

Huge Quantity of Poplar and Spruce Available.

The Edmonton Bulletin says that a source of pulp and paper supply is to be found in the very considerable spruce timber which are included in the spruce forests of white poplar in the region north and west of Edmonton. It says:

"While poplar predominates there are considerable areas of spruce timber that would be valuable for pulp production. The great demand is for transparent paper, which can be made largely or altogether of spruce. But some paper can be used for almost every other kind of pulp.

P. A. Burrows, in a recent interview, said that the spruce and spruce pulp woods available at the pulp works of the Saskatchewan, Manitoba and Alberta. There are upwards of 100,000,000 acres of timber in the three provinces.

The vast drainage basin of the Athabasca was originally almost covered with spruce forests. These have cleared away a large part of the original forest, but there are still large areas of spruce woods that are available for pulp making as well as lumber. In all cases the presence of poplar adds materially to the total tonnage that could be made from spruce alone.

Green Food For Hens.

With hens being fed mostly on green food it is important that plenty of green food be given. One of the best ways to help to keep the requirements of vitamins but it also is beneficial as a regulator. The nearer one makes the hen feel that still have spring conditions the better egg production will be.

I have found that the use of very ordinary, seasoning like salt for there may be reasons for a salt diet. So be sure to inquire if salt may be used in any quantity, however, it may be.

Another variation of your chicken broth is mushroom soup. To prepare this, clean and chop three mushrooms and saute in a teaspoonful of butter for a few minutes. Add one egg yolk, slice a beet, one tablespoon cream, a teaspoonful of butter and a little salt and pepper.

In place of the mushrooms one might use a tablespoon of cooked carrots, a cup of sliced beet, a cup of sliced carrots, a cup of sliced onions and a cup of sliced carrots.

The Oily Oil for the Athlete.—In rubbing down, the athlete will find Dr. Williams' Pink Pills, as well as the blood, to be of great service. It renders the muscles and sinews pliable, takes the stiffness out of the joints and relieves the pain of sprains for which that may be pain upon him.

It stands pre-eminent for its power to heal, as it can be used for years, and it is safe to say, it can be used for a lifetime.

Broths for the Invalid

BY LORETTA C. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

Perhaps one of the first things the average housewife thinks about when broth is recommended for the invalid is that it may remedies but they are good for getting worse instead of better. One day I came across a book on "Medical Discovery and Cookery" and took it. I have great faith in this medicine and hope my invalid will be cured.

There are other members in the family, have the butcher split the bird in half and chop it into pieces. The mother has no time to do this, so I have my husband cut into several larger pieces, and, perhaps, made into stew, rice for the well members. But the half that has been chopped in very small pieces will bring the flavor from the meat.

Put the pieces into a cool pot and cover them with cold water. If the physician has no objection to the patient having salt in his diet, add half a level teaspoonful of salt. Salt will bring out the flavor of the meat and the nutritive part.

Very gradually bring the heat to the boiling point, to reduce the temperature, so that the mixture simmers very slowly. When the meat has fallen from the bones remove the pot from the flame and strain. Let the meat cool, then cut it into pieces and have it hardened into a cube, which can easily be removed from the top.

This fat makes excellent shortening for biscuits for the well folk. Pour off liquid, so as not to lose the fat.

The cold broth may either be stored in a wide-mouthed covered jar in the refrigerator, or it may be immediately refrigerated for use.

If the broth does not seem as clear as you would like, strain it through double cheesecloth or a sieve.

From the system the patient chronic experience immediate relief.

Equally good for the liver.

For the lungs the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the heart, the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the kidneys the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the brain the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the eyes the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the skin the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the hair the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the nose the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the mouth the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the teeth the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the ears the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the bladder the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the kidneys the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the liver the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the lungs the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the heart the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

For the eyes the patient will find the following: a small amount of the following will draw to itself all the tiny particles. The egg will be strained through a sieve and the yolk will be added to the broth.

Many Haitians meet Death

PORT AU PRINCE, Haiti.—A total of 1,142 Haitians met death since the beginning of the intensive campaign against the bandits of the island approximately two years ago, it is shown by the naval court of inquiry after a three week probe just concluded into the actions of United States marines in Haiti. This total includes the fatalities alleged to have been killed by ex-Corp. Freeman Lang and Sergt. Dorcas Williams.

Outside the ten deaths charged against Lang and Williams all the deaths accounted for during the hearing fell in the 298 actual battles that occurred, including the attack on Port au Prince in January, according to the testimony.

"You're under arrest," exclaimed the officer, as he stopped the automobile.

"What for?" inquired Mr. Chug-gins.

"I haven't made up my mind yet,
I'll just look over your lights, an
license, an' your numbers, an' so forth.
I know I can get you for somethin'."Mennonite Colony
will be Refused
Entry to States

Washington.—The colony of Mennonites from Canada which proposes to migrate to the United States and settle in Mississippi will be refused admission to the United States as such it was said recently at the State Department, but if the individual members present themselves at the border bearing proper passports, it would be difficult for the immigration authorities to turn them back.

The Mississippi division of the American Legion has protested to the State Department against admission of the colony. In a resolution recently adopted the Mississippi division said the Mennonites were undesirable because they have remained at home while Canada was being "bled white" in the trenches in France.

Plotted against the
Italians at Fiume

ROMA.—The discovery of a plot in Milan in which the Fascisti (extreme Nationalist Party) and anarchists are alleged to have been preparing a joint attack on the Italian army operating against Fiume is reported by the newspapers here. Seventeen persons have been arrested in connection with the plot, the newspapers say.

Genius

Genius is only the power of making continuous efforts. The line between failure and success is so fine that we scarcely know when we pass it—so fine that we are often in doubt and we do not know it. How many a man has thrown up his hands at a time when a little more effort, a little more patience would have achieved success. As the tide goes out, so it comes clear in. In business, sometimes, prospects seem darkest when really they are on the turn. A little more persistence, a little more effort, and what seemed hopeless failure may turn to glorious success. There is no defeat except in no longer trying. There is no defeat except within, no really incurable barrier, save our own inherent weakness of purpose.—Elbert Hubbard.

Sand Bank the
cause of
Train Wreck

C. P. R. passenger train No. 68 from Kootenay Landing to Medicine Hat, was delayed for nine and one-half hours recently through the engine having a couple of its drive wheels and being derailed when it ran into a sand bank just west of Kipp, about 1:30. The sand had been piled on the track during the early hours of the night by the high wind and the engine was upon it before the engineer could stop it.

Luckily none of the passenger coaches left the track, and few, if any, of the passengers knew of the accident until long afterwards. The track was cleared and the train got under way, but the night westbound was held up. All day trains ran on schedule, however.

SUFFOCATED TO DEATH

PICTOU, N.S.—Daniel Barry, for many years a prominent citizen of Pictou, was suffocated to death on December 30 in his home where he lived alone.

The individual who is suspected of taking the missing roll is thought to have boarded the train at Cranbrook, buying a ticket to Coleman, but not getting off there. While in the train secured another ticket from Coleman to Bellevue, and still another from Bellevue to Macleod. The police have a full description of him, and a search is being made far and wide for him.

OUR BIG SALE WILL CONTINUE
to the
END OF JANUARY
This has proved to be a Real Sale.
GENUINE BARGAINS ARE RAMPANT IN EVERY DEPARTMENT

Some of the lines are almost sold out, but we still have a vast stock from which to make selections.

The chief reason for this being the only real busy store in the District are—

We Give the GREATEST VALUE for YOUR MONEY;
We Render the Most Cheerful and Efficient Service;
We Always Consider Your Interest;
And We Sincerely Appreciate Your Trade.

A word with the wise is sufficient, line up with the crowd.

BURDETT MERCANTILE STORE
A. H. RYGG, PROP.Government
Pulp Mills

TORONTO.—Twelve hundred men are at work at Spruce Falls, Ont., formerly known as Kapuskasing, pulp mills which are being rushed to completion, and thousands of cords of pulpwood are being cut. The first unit of the Government pulp mills will be completed by next May, Premier Drury announces.

Edits to Eat

(Sweet Grass Advocate)

Six chickens, two ducks, a turkey, four pounds of butter and six dozen of eggs were taken in at the Advocate office this month on subscriptions, which goes to show that the country is not in such bad shape as some people seem darkest when really they are on the turn. A little more persistence, a little more effort, and what seemed hopeless failure may turn to glorious success. There is no defeat except in no longer trying. There is no defeat except within, no really incurable barrier, save our own inherent weakness of purpose.—Elbert Hubbard.

Standing Alone

In a very real sense, every man stands alone. Just as alone as though he were the only man in the world. While there are times when we may think "in mass" and work in gangs, and trade in corporations, and pray in congregations, and sing in choirs—nevertheless, there comes to each of us the time when we must do these things alone. When a young fellow starts out in his musical career, taking his place in a chorus, he is not particularly disturbed if he fails to make good upon every occasion, because he knows that one or more of his neighbors in the chorus will do so, so that his failure will not be noticed. But when he begins to sing solo parts, he knows that it is strictly up to him to make good. He must strike high "G" or low "F" clear and strong, without flabbiness or uncertainty. For the time being, he becomes the only man in the chorus.

Each of us has our solo part in life—occasions when we cannot depend upon our neighbors in the chorus to do our part. Nor can we "fake" the score which we have imperfectly learned. Inefficiency, or ignorance, or weakness, cannot then be given as an excuse. This does not mean that we shall be expected to play another's part, any more than you'd expect a bass voice to sing the soprano score. There's variety enough in life to give each of us a solo, fitted to our peculiar range. If you cannot take high "C" comfortably, you may sing the tones of the middle register with greater power and effectiveness.—Rev. Charles Steele.

Passenger Loses

\$600 Roll But
Suspected

Pick-pocket Escapes

Details have come to hand in regard to a robbery alleged to have taken place on the C. P. R. eastbound "Crow's Nest" train which necessitated its being held up for an hour at Macleod at a few minutes past one on the morning after Christmas Day. The delay was caused through a search having to be made, following the complaint of T. E. McCutcheon that he had been robbed of his roll of \$600 while he was asleep on one of the seats in the smoking car. The search was conducted by Sergt. Allen and two constables of the R. C. M. P. station at Macleod when the train pulled up.

It appears that McCutcheon got on the train at Bellevue, and, it is alleged, was much under the influence of drink at the time. He fell asleep on a seat in the smoking car and awoke a few minutes before the train arrived at Macleod. Jumping up he claimed that he had lost his roll of \$600. A man sitting on the seat opposite McCutcheon told him that he had seen the sleeping car conductor take his money from his pocket, whereupon McCutcheon started off to find the conductor.

Meanwhile the man who had volunteered the information, and who is suspected of being the thief, suddenly disappeared from the train.

Suspect Escapes

Sergt. Allen after searching the train turned the case over to the town constable, Ridley, who proceeded to make a search of the C. P. R. yard. While doing this he came across a constable, Ridley, who was the suspect, and who had tried to get away on a freight train to Calgary. On seeing the constable the man started off to make tracks, pursued by the constable, who lost him in the timber at the river bottom.

Corporal Watt of the A. P. P. was informed of what had taken place about on o'clock on the 26th, about twelve hours after the man was lost at the river bottom, and started out on his trail. He picked it up from the timber on the track which led out of it, marked very plainly in the deep snow. He followed it for about five miles through fences and fields, and then further trace was not possible.

The individual who is suspected of taking the missing roll is thought to have boarded the train at Cranbrook, buying a ticket to Coleman, but not getting off there. While in the train secured another ticket from Coleman to Bellevue, and still another from Bellevue to Macleod. The police have a full description of him, and a search is being made far and wide for him.

Swiggum Is Free

Of Murder Charge
Self-Defence Plea

SHELBY.—After a preliminary hearing in a Justice of the Peace Court at which the case for the State was handled by County Attorney J. G. Henderson, the complaint against Mike Swiggum of Sweet Grass, charged with the murder of Henry Jacobson several weeks ago, was dismissed. The Swiggum case was conducted along the line of self-defense.

Swiggum, who is a one-armed man, was arrested in Lethbridge following the shooting of Henry Jacobson near Sweet Grass over a whiskey mix-up. Swiggum was in the hospital here when arrested, and was handed over to the Montana authorities.

DETROIT.—Official admission that

the Ford Motor Co.'s Highland Park plant, which normally employs from 50,000 to 60,000 men, will remain closed through February 1, was made recently. The original intention called for the suspension of operations during the regular mid-winter inventory period for two weeks, when the plant closed December 24, but after a conference of Ford officials, it was decided to continue the shut-down until February 1.

He Takes Nice Hot
Bath and Comes
Out "Cleared"

MONTREAL.—Kastny Awanchuk, Coughlin, Ont., on his way to Russia through this city, found that a bath cost him just over \$2.00.

Passing by the Windsor Hotel he was accosted by a man who recommended him to a room where he could get a hot bath to "refresh himself." He went there and took the bath and on going into the room afterwards found the man had decamped with his money, \$2,100 in all.

De Valera arrives
safely in Ireland?

NEW YORK.—Eamonn De Valera, "President of the Irish Republic," has arrived safely in Ireland. Harry Boland, and his secretary, announced. De Valera effected his landing on Irish soil on December 31, said Boland. He gave no other particulars.

Elevator Companies
Increase Capital

OTTAWA.—It is announced in last week's Canada Gazette that the Saskatchewan Elevator Company, Limited, and the Home Grain Company, Limited, each increase their capital stock from \$250,000 to \$500,000.

EXIT JAZZ MUSIC

CHICAGO, Ill.—The demise of jazz music and a remittance of good music were predicted by delegates to the National Teachers' Association here.

Item Reporters and Correspondents wanted for the Bow Island Review, in every District not yet represented, yours may be that very District. No harm to write in and see, if this interests you write now.

Burdett News

From our own Correspondent

Monday the 3rd January was the first meeting date of the Council for the new year and as the old Councilors were elected by acclamation the main business of the evening was the hiring of secretary treasurer and the appointing of the Reeve for the ensuing year. G. H. Johnston was re-elected Reeve, with raise in salary and Alex. Hamilton was re-elected Reeve for the year 1921. The rate payers of Burdett expect big things from the Council this year and the Councilors have expressed themselves as hoping they will not be disappointed, as they are all Burdett boosters.

Additional
Bow Island

Mrs. McLean of Bow Island spent Xmas with her daughter and friends at Medicine Hat returning home on Thursday last.

Mr. Chancy Money and Mr. McDonald were business callers to town on Monday last.

A number of our young people attended services at Fertile Plains Church on Sunday last.

Mrs. Hitchon spent Xmas Holidays with friends at Grassy Lake.

January 9th
Special MeetingFord Automobile Plant
to Close until February 1

DETROIT.—Official admission that the Ford Motor Co.'s Highland Park plant, which normally employs from 50,000 to 60,000 men, will remain closed through February 1, was made recently. The original intention called for the suspension of operations during the regular mid-winter inventory period for two weeks, when the plant closed December 24, but after a conference of Ford officials, it was decided to continue the shut-down until February 1.

Heavy Loss Made
on First Voyage
of Big Leviathan

LONDON.—A prominent member of the Baltic exchange tells me that there is much talk in shipping circles that the day of the super-steamer for commercial purposes is done. He points to the case of the Dutch boat, the S.S. Brabantia, which has recently returned to the port of Amsterdam from her first trip to South American ports, where it was discovered in the case of many harbors that her draught was too deep for her to enter.

I am told that this first trip was made with a loss of close on half a million florins, partly because the prices of the luxurious first-class accommodation were so high that few travelers making the trip for business purposes can afford to make use of it. It is now expected that she will be transferred to the North Atlantic service, for which she was not intended.

Meanwhile there is talk of the giant Imperator being purchased by a hotel syndicate and being converted into a wharf-side hotel. She is equipped in every sense as luxuriously as any fashionable New York hotel and there is no doubt that the proposition, if it once became popular, would pay a very handsome dividend.
